March 26, 2013

Lunenburg Dog Park Society
Attention: Karen Lewis

I have been hearing about the dog park project around town in recent months but I really got excited when Karen Lewis explained the possibility of using the site on Starr Street. It seemed such a logical, practical use for lands that are currently unusable and has the potential to be a major benefit to the town. As a dog owner myself, I well know the advantages to having a large area where dogs can exercise off leash, away from those who are not interested in interacting with them. Even better to the relief of the owners of small dogs, to have a place where the little guys can play safely away from big pups. When I travel with my dog, I am always drawn to areas that feature this kind of park, so I am quite convinced that visitors to our area will also find this new area to be a marvelous addition.

Ironworks is pledging to help support the park by participating with the addition of a water fountain. Also, we have more than enough blue barrels that we can donate to serve as refuse containers throughout the field and also carve up to serve as tunnels and other dog play apparatus.

We're very grateful that Karen and her committee have taken on the task of bringing the dog park dream into the world of reality!

Regards

Lynne MacKay
